# UI / GRAPHIC DESIGNER

---

## Job Description

The job role is varied from digital to print, design to marketing, desktop to web. There is not one type of work that you will be asked to do. There is a wealth of opportunities to learn new, and develop current skills.

We are looking for a creative who strives for improvement, obsesses about pixel precision, and balances form with function.

Personality wise, we are a small team who don't take ourselves too seriously. It is a relaxed atmosphere where everyone's ideas matter. We are looking for someone who can slot straight into this set up.

## Key Responsibilities

- ✂ Desktop, Web & Mobile UI design & development
- ✂ Client branded UIs
- ✂ Pitch documents
- ✂ Website maintenance
- ✂ Office artwork

## Required Experience

- ☑ Adobe Illustrator
- ☑ Adobe Photoshop
- ☑ Adobe InDesign
- ☑ Sketch
- ☑ HTML
- ☑ CSS / SASS

## Amazing to have

- + Adobe AfterEffects
- + PHP
- + FXML / XML
- + JavaFX CSS
- + Source Tree / Git Hub
- + Apache Open Office

## About the Company

We are a young Fin-tech founded due to frustrations with rigid trading technologies. We are passionate about creating flexible and forward thinking software that has the user's needs at the heart of it.

We're based in the super central Moorgate. The office is a great place to work and hosts design and tech events weekly providing a great work / play mix. We also have offices in Hong Kong and are expanding to New York so there are opportunities to explore outside of England's green and pleasant land.
