JAVA DEVELOPER

Job Description

Celer Technologies are looking for a software developer to join our team whether you are a graduate or mid level.

You will be utilising cutting edge technology to become involved in the complete software development life cycle; from conception through to delivery across a wide range of greenfield projects.

There may also be the opportunity to travel abroad to work with our clients.

We mainly code in Java so experience using this would be a bonus but is not essential as long as you have the ability to learn quickly. Good maths skills are also very important along with an analytical mind and a hard-working attitude.

Personality wise we are a small team who don't take ourselves too seriously. It is a relaxed atmosphere where everyone's ideas matter. We are looking for someone who can slot straight into this set up.

Key Responsibilities

- Writing and coding from specific requirements
- Testing
- Writing user documentation & working with Support team
- Evaluating current and newly built software in order to enhance the product

Required Experience

- Java (1+ yrs experience)
- Ability to develop web or server side applications
- Good documentation skills
- English speaking
- Showcase external projects outside of work

About the Company

We are a young Fin-tech founded due to frustrations with rigid trading technologies. We are passionate about creating flexible and forward thinking software that has the user's needs at the heart of it .

We're based in the super central Bank. The office is a great place to work and hosts events weekly providing a great work / play mix. We also have offices in Hong Kong and Miami so there are opportunities to explore outside of England's green and pleasant land.
